Grade must be at least
85 (B-) or
Re-Test

TELECOMMUNICATIONS VOCABULARY TEST

- _____ 1) The act of sending and receiving information electronically between two or more computers via modem and phone line/cable or local area networks
- _____ 2) Software that searches, gathers and identifies information from a database based on keywords, indices, titles and text
- _____ 3) Basic ways to begin a search.
- _____ 4) Small text files that identify a user's personal preferences and settings and allows the web site's server to retrieve your information from its database.
- _____ 5) Sending and receiving messages through a computer network. This process requires a computer, modem or network connection, and an e-mail address.
- _____ 6) Connections that bridge one image, page, or word to another by clicking on a highlighted word or phrase.
- _____ 7) Two examples of Browser software
- _____ 8) A separate document that you may send with an e-mail message. It might be a document, such as a report that you need to send to a teacher, or it could be a photograph or another type of computer file.
- _____ 9) A global network of thousands of other computer networks that offers e-mail and information retrieval services to millions of people.
- _____ 10) A device that permits a computer to transmit and receive data over a telephone line.
- _____ 11) Three examples of Search Engines
- _____ 12) Using a camera and phone lines or the Internet, allowing individuals at two or more sites to see and hear each other
- _____ 13) The host name is often referred to as:
- _____ 14) Full website address. Example: <http://www.wcpss.net>
- _____ 15) First part of an e-mail address. Example: jsmith is the user name of the following e-mail address. jsmith@wcpss.net

- _____ 16) Software used to view various kinds of Internet resources found on the World Wide Web.
- _____ 17) The name given to a computer directly connected to the Internet. These computers are associated with computer networks, online services, or bulletin board systems.
